Dinh Do Ba Thi

Senior Platform Engineer

SUMMARY

Dynamic Senior Platform Engineer with over 5 years of experience in optimizing cloud infrastructure and implementing effective DevOps practices. Expertise in managing complex CI/CD pipelines and overseeing Kubernetes clusters significantly enhances operational efficiency and cost-effectiveness. A strong commitment to automating workflows and maintaining high-availability systems drives continuous improvement and excellence. Passionate about tackling new challenges and delivering transformative solutions to elevate team performance and achieve strategic objectives.

EXPERIENCE

Senior Platform Engineer
GFG Group — Ho Chi Minh

Jan 2025 - Present

Managed cloud-based infrastructure utilizing AWS & Azure, enhancing workflow orchestration for application deployment.

- Migrated CI/CD pipelines from legacy systems to GitHub Actions, improving efficiency.
- Delivered 24/7 on-call support leveraging Datadog for observability and JSM for incident escalation, resolving P1-P2 critical alerts to reduce mean time to resolution (MTTR).
- Oversaw AI platforms and tools, ensuring operational support for business processes.
- Designed and implemented monitoring solutions to ensure system reliability and performance.
- Coached junior engineers in best practices for cloud infrastructure management and automation.

SRE

GFT Group — Ho Chi Minh City

Dec 2022 - Dec 2024

Worked as SRE for a big digital bank in Singapore with these tech-stack:

- Transitioned the CI Pipeline from Circle CI to Harness NextGen.
- Migrated CD Pipeline from Harness FirstGen to Harness NextGen.
- Built Sumo Logic dashboards and log-based alerting across production banking services to monitor SLIs/SLOs, cutting incident detection time by 40%.
- Led root-cause analysis using Sumo Logic log analytics during on-call rotations, reducing recurring P1/P2 incidents and improving MTTR for a digital banking platform.
- Oversaw the management of over 40 Kubernetes clusters and 10+ related components using Terraform.
- Controlled Helm charts for microservices and provided support for associated pipelines
- Continuously update and enhance infrastructure for consistency while ensuring it meets security requirements
- Deploy Karpenter on Kubernetes Clusters as part of cost optimization (saved ~30% ec2 cost)

DevOps Engineer

MANABIE VIET NAM — Ho Chi Minh City

Feb 2022 - Nov 2022

Restructured Helm Chart and developed a shared template library for subcharts

- Achieved a significant 30% reduction in pipeline runtime and also reduced infrastructure cost by nearly 40%
- Spearheaded incident response efforts, offering hands-on troubleshooting during service interruptions and minimizing downtime to less than 4 hours.
- Actively engaged in the implementation of Github Action pipelines and local deployment tools.

DevOps Engineer & System Administrator

Dai-ichi-life Viet Nam — Ho Chi Minh City

Aug 2020 - Jan 2022

Research & apply devops culture to optimize application deployment processes.

- Install & manage CI/CD tools (Docker, Jenkins,) to deploy application from Gitlab to multiple enviroments.
- Manage Data Center included Windows Server 2003 - 2022, Ubuntu and Redhat using VMWare and Hyper-V (Using Terraform and Powershell)
- Deploy and maintain Azure Cloud systems.
- Deploy VDI system using VMWARE HORIZON, vsphere, vCenter
- Deploy Ansible (Ansible Tower) for server's config management
- Utilize Zabbix and Grafana for monitoring systems

Lead IT System & Network Administrator

SGH Asia Ltd — Ho Chi Minh City

Feb 2017 - Jul 2020

Designed and maintained robust server and network infrastructure supporting 150 end users.

- Ensured high availability and reliability of IT systems, optimizing performance across the organization.
- Executed firewall upgrades and implemented VMware solutions to enhance security and efficiency.
- Automated system administration tasks, significantly improving operational workflows and efficiency.
- Coached a team of 4 System Administrators, fostering skill development and promoting best practices.

System Admin & Helpdesk

TRG, VTV, CLV — Ho Chi Minh City

Aug 2013 - Feb 2017

EDUCATION

Bachelor of Science

Ton Duc Thang University | Oct 2010 - Jan 2017

Network Engineering - Microsoft Technologies

NIIT Hoa Sen | Sep 2011 - Sep 2013
